

# RENEW™ BELT DRESSING

## DESCRIPTION

**RENEW™** was developed to meet the demands of today's industrial grade belt dressing. **RENEW** eliminates problem belt slippage on all round, flat and "V" power transmission belts, auto fan belts and all industrial and farm machinery belt drives.

**RENEW's** dry, tacky film increases traction while permitting decreased belt tension for longer belt life. Can increase power up to 50%. **RENEW** is resistant to water wash-off and performs effectively under wet conditions. **RENEW** removes residual build-up and will not glaze or collect dirt and dust. May be applied while belts are in operation.

- Prevents Slippage
- Stops Squeaks, Squeals
- Extends Belt Life
- Resists Water Wash-Off
- Increases Power
- USDA/FDA Authorized
