

SILVER PLUS REGULAR

METALLIC ANTI-SEIZE

DESCRIPTION

JET-LUBE's SILVER PLUS REGULAR metallic anti-seize is designed to provide a protective film against galling and seizure over a wide range of applications. The micro-sized particles produce a smooth creamy consistency that allows it to quickly and easily coat fine-threaded and small and large-diameter fasteners.

SILVER PLUS REGULAR utilizes water resistant, high temperature complex base grease as its carrier giving it superior "stay put" qualities. The complex thickener and highly refined base fluids allow for brushability from -20°F (-29°C) to 450°F (232°C). The petroleum carrier, however, makes SILVER PLUS REGULAR unsuitable for oxygen service.

SILVER PLUS REGULAR contains micro-sized aluminum and graphite extreme pressure and anti-wear particles. The metallic component makes it very conductive and since the primary anti-seize particles are aluminum; it nearly eliminates the potential for galvanic corrosion.

- Shiny Silver Color
- Service Rating: -65°F (-54°C) to 1800°F (982°C)
